- D. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation acres; Stockwatering ; Domestic _____;

Other (specify) _____

- E. Changes in Method of Diversion – Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

- F. Please answer only those questions below which are applicable to your project.

1. Conservation of water

- a. Are you now employing water conservation efforts? YES NO
Describe any water conservation efforts you have initiated: _____

- b. If credit toward beneficial use of water under claimed pre 1914 appropriative water right for water not used due to a conservation effort is claimed under section 1011 of the Water Code, please show the amounts of water conserved:

Reductions in Diversions:

yr _____ (af/mg) yr _____ (af/mg) yr _____ (af/mg)

Reductions in consumptive use:

yr _____ (af/mg) yr _____ (af/mg) yr _____ (af/mg)

I have data to support the above surface water use reductions due to conservation efforts. YES NO

"The energy challenge facing California is real. Every California needs to take immediate action to reduce energy consumption.

Water Rights in California, and (3) Appropriation of Water in California.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or appropriate.

Proposes a new appropriation upstream from their divisions, and (3) assesses the State to determine if additional water is available for future with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license An appropriate right is required for use of water diversion and pre 1914 appropriate water users as set forth in Water Code section 5100

from the State. Appropriate rights can be granted to water "foreign" to the natural stream system.

Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or other "foreign" water to the natural stream system.

Riparian rights may be stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or other riparian users.

Reservoir of the riparian right to the served parcel. Generally, a riparian water user must share the water supply with other riparian users.

The same watershed as the water source and must never have been served from the sources of supply by an intervening parcel without the same watershed being a natural lake or stream to take and use water on his riparian land. Riparian land must be in

A riparian right enables an owner of land bordering a natural lake or stream to take and use water in his riparian land.

There are two principal types of surface water rights in California. They are riparian and appropriate rights.

*SJW
5/10/05*

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office.

We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Statement of Water Diversion and Use must be filed by preparan and pre-1914 appropriations. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation, and (3) assists the State to determine if additional water is available for future appropriators.

Statement of Water Diversion and Use is required for general information, and (3) assists the State to determine if additional water is available for future appropriators.

An appropriate right is required for use of water, "foregin" to the natural stream system. There is a surplus not needed by preparan users. Since 1914, new appropriators have been required to obtain a permit and license from the State.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his preparan land. Riparian land must be in the same watershed as the water source and must never have been served from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a preparan user must share the water supply with other preparan users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from a groundwater, or other "foregin" water to the natural stream system.

An appropriate right is required for use of groundwater, or to the natural stream system. There are two principal types of surface water rights in California. They are riparian and appropriative rights.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California, riparian and appropriative rights.

A **riparian right** enables an owner of land bordering a natural lake or stream to take and use water from the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the natural watershed. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An **appropriative right** is required for use of water not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State. An appropriative right is exercised only when there is a surplus not needed by riparian water users. Generally, appropriative rights may be exercised a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available, including the following:

"Information Pertaining to Water Rights in California"
"Statement of Water Division and Use"

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

Statements of Water Division and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water from his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

"Information Pertaining to Water Rights in California"
 "Water Rights for Stockponds Consistently Prior to 1969"
 "Statement of Water Division and Use"

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

Statements of Water Division and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to determine if additional water is available for appropriation upstream from their diversion, and (3) assists the State to notify such users if someone proposes a new statement.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been served from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statement of Water Diversion and Use must be filed by riparian and pre-1914
appropriative water users. The filing of a statement (1) provides a record of water
use, (2) enables the State to notify such users if someone proposes a new appropriation
upstream from their diversion, and (3) assists the State to determine if additional
water is available for future appropriators.
